## TECH STACK

### LANGUAGES

TypeScript · JavaScript · C# · SQL · HTML/CSS

### BACKEND

NestJS · Node.js · PostgreSQL · Prisma · PostGIS · ASP.NET Core · SQL Server

### FRONTEND

React · Next.js · Tailwind · Astro · Storybook

### MOBILE

React Native · Expo · Reanimated · NativeWind

### AI

Claude Code · MCP · Anthropic API · Ollama · Agent skills

### DEVOPS

Docker · GitHub Actions · nginx · Azure · Cloudflare · MinIO

### GAMES

Unity · Unreal Engine 5 · MonoGame · DOTween

Full-stack developer in Istanbul. Since June 2026 I've been building Patimania, a pet-services marketplace with a website, an iOS and Android app, and business and admin panels. I build with AI coding agents and check the work with tests and CI guards I wrote myself. Before that I spent six years making games in Unity.

## EXPERIENCE

Jun 2026 — now

### Full-Stack Developer · Patimania

- Designed and built the product: NestJS API (32 modules), Next.js website (128 routes), React Native + Expo app (45 screens), business and admin panels.
- PostgreSQL + PostGIS data model with 68 tables; double booking blocked in the database with an EXCLUDE constraint; escrow money flow with an append-only ledger.
- AI-assisted development with Claude Code, checked by 76 end-to-end test suites (3,900 assertions), 7 CI guard scripts and 102 written decision records.
- Docker on a server in Türkiye, a staging-to-production pipeline and OTA mobile releases. Soft launch: real payments off, app in Google Play closed testing and TestFlight.
